ASEA JOURNAL

VOLUME 36

1963

PUBLISHED BY
ASEA
VÄSTERÅS, SWEDEN

LIST OF AUTHORS

	Page		
<i>Arnemo, H.</i>		<i>Magnusson, I.</i>	
The new series of ASEA marine generators	155	The bulk-handling installation at Oxelösund harbour ..	
<i>Giege, S.</i>		<i>Marup-Jensen, G.</i>	
Efficiency tests and noise measurements on two large marine gears	3	Efficiency tests and noise measurements on two large marine gears	
<i>Hanås, B.</i>		<i>Olsson, R. L.</i>	
ASEA induction stirrer in a Japanese steelworks	67	Series or shunt capacitors for power distribution?	
<i>Hollander, S.-G.</i>		<i>Reibring, G.</i>	
The electrical equipment for the Kaldo furnaces at Oxelösund Steelworks	18	A rectifier-fed continuous hot-strip rolling mill	
<i>Håkansson, G.</i>		<i>Ryhd, N.</i>	
A rectifier-fed continuous hot-strip rolling mill	47	Electrical equipment for rotary printing presses	
A rectifier-fed billet mill	111	<i>Spjut, L.</i>	
<i>Karlsson, A.</i>		Resistors with sheet-steel grids	
Transducer-controlled silicon rectifiers for feeding shunt-wound d.c. motors	51	<i>Stackegård, A.</i>	
<i>Lamm, U.</i>		A 750 V, d.c. circuit-breaker for traction purposes	
High-voltage direct current – new applications and new systems	91	<i>Stendal, K.-E.</i>	
<i>Larsen, K.</i>		Mine winder with low-frequency braking	
A torque magnetometer for the investigation of magnetic anisotropy	15	<i>Svantesson, E.</i>	
<i>Latta, M. G.</i>		High-frequency melting plant available at reduced capital outlay	
Interconnection of the North and South Island electric power systems of New Zealand	72	<i>Svedebrand, R.</i>	
<i>Lewkowicz, H.</i>		A rectifier-fed billet mill	
Totally enclosed pipe-cooled induction motors	10	<i>Svensson, I.</i>	
<i>Lindberg, P.</i>		Flashing-light annunciator system	
Organisation by product – the initiation of a new ASEA policy	80	<i>Tiljander, K.</i>	
<i>Löfgren, L.</i>		Mains-frequency induction furnaces of channel type	
The peak and stand-by power plant at Svenska Dagbladet, Stockholm	161	<i>Wadstein, H.</i>	
		Large ASEA arc furnaces of swing-roof type	
		<i>Wallgren, A.</i>	
		Worm gears	
		<i>Wass, L.</i>	
		Geared motors with ratings of 0.125–15 kW	

LIST OF CONTENTS

	Page		Page
<i>Search and testing</i>		<i>Switching and control equipment</i>	
Efficiency tests and noise measurements on two large marine gears	3	Star-delta switching starters*	22
Torque magnetometer for the investigation of magnetic isotropy	15	145 kV air-blast circuit-breakers for India*	24
Quintus press for calibration of pressductors*	44	Flashing-light annunciator system	30
Electric cable for deep level surveying*	83	A 750 V, d.c. circuit-breaker for traction purposes	36
Long toroductor equipment for laboratory measurements*	86	New signal thermometers*	38
Increased resources for testing large machines*	148	Programme controller for the automatic control of industrial processes*	40
<i>Turbines</i>		Gas-flow indicator*	62
ASEA electro-hydraulic governor*	87	Automatic pilot for underground railway trains*	63
<i>Gears and electric machines</i>		Centre-zero relay type RMOB*	63
Completely enclosed pipe-cooled induction motors	10	Digital voltmeter for pressductor weighing devices*	83
The electrical equipment for the Kaldo furnaces at Oxelösund Steelworks	18	ASEA electro-hydraulic governor*	87
Motor for a reversing blooming mill*	21	Resistors with sheet-steel grids	103
Form gears	27	Regulating amplifier of plug-in type*	107
High-frequency melting plant available at reduced capital outlay	34	Protective cover for contactors*	108
70-year-old ASEA motor still in use*	39	ASEA relay test terminal block*	126
Pulse-exciter set for synchronous machines*	40	Programmer for automatic roll setting*	151
Overhung worm gears for pulp filters*	41	Extra two-way contact for contactors*	152
Pressductor-controlled silicon rectifiers for feeding shunt-wound d.c. motors	51	<i>Traction and marine equipment</i>	
Overhung geared motors*	64	Efficiency tests and noise measurements on two large marine gears	3
Large delivery of commutator motors to the Thomson Newspapers Ltd., Great Britain*	88	Automatic pilot for underground railway trains*	63
Geared motors with ratings of 0.125-15 kW	137	The new series of ASEA marine generators	155
Increased resources for testing large machines*	148	<i>Cranes, hoists and materials-handling equipment</i>	
The M motor in use*	149	Mine winder with low-frequency braking	96
The new series of ASEA marine generators	155	Shaft-sinking hoist with disc brake*	127
<i>Transformers and transductors</i>		The bulk-handling installation at Oxelösund harbour ..	142
Sealing ends for the direct connection of oil-filled poles to transformers*	23	Shielded contact track with current collectors for overhead cranes and travelling hoists*	170
New signal thermometers*	38	New hoist controller*	171
Wheels and bogies for power-transformers*	39	<i>Electric furnaces</i>	
Rectifier transformer for 12-pulse direct voltage*	43	High-frequency melting plant available at reduced capital outlay	34
Pressductor-controlled silicon rectifiers for feeding shunt-wound d.c. motors	51	ASEA induction stirrer in a Japanese steelworks	67
ASEA transformers in South Africa*	125	Mains-frequency induction furnaces of channel type ..	117
Capacitor voltage transformer for 735 kV*	147	Large ASEA arc furnaces of swing-roof type	131
<i>Rectifiers</i>		<i>Electric power plants and networks</i>	
Mercury-arc rectifier type JRCL 11*	22	Series or shunt capacitors for power distribution?	57
Rectifier transformer for 12-pulse direct voltage*	43	Interconnection of the North and South Island electric power systems of New Zealand	72
Rectifier-fed continuous hot-strip rolling mill	47	The first 735 kV power transmission system in the world ..	84
Pressductor-controlled silicon rectifiers for feeding shunt-wound d.c. motors	51	High-voltage direct current - new applications and new systems	91
Interconnection of the North and South Island electric power systems of New Zealand	72	The peak and stand-by power plant at Svenska Dagbladet, Stockholm	161
High-voltage direct current - new applications and new systems	91	<i>Industrial equipment</i>	
Rectifier-fed billet mill	111	The electrical equipment for the Kaldo furnaces at Oxelösund Steelworks	18
Silicon-rectifier installation for aluminium electrolysis* ..	172	Two interesting deliveries of sugar centrifugals*	42
<i>Capacitors</i>		Quintus press for calibration of pressductors*	44
Series or shunt capacitors for power distribution?	57	A rectifier-fed continuous hot-strip rolling mill	47
Capacitor voltage transformer for 735 kV*	147	Large delivery of commutator motors to the Thomson Newspapers Ltd., Great Britain*	88

* Published under the heading "News in brief".

	Page
Quintus presses for the manufacture of diamonds*	107
A rectifier-fed billet mill	111
The bulk-handling installation at Oxelösund harbour ..	142
Electrical equipment for rotary printing presses	165

Organisation and staff notices

New ASEA brochures	9
New ASEA brochures	33
Academic honour conferred upon ASEA Director	38
Dr Erich Uhlmann awarded the gold medal of the Swedish Academy of Engineering Science (IVA)*	62

Organisation by product – the initiation of a new ASEA policy	1
New ASEA brochures	1
Four Export Directors appointed at ASEA*	1
Doctorate conferred on Farouk Rizk*	1
ASEA exhibit pressductors and thyristors in Milan* ..	1
The 10th International Exhibition of Mechanical Handling Equipment, Paris*	1
The Hanover Trade Fair 1963*	1
New ASEA brochures	1

* Published under the heading "News in brief"
